Welcome to our catalogue!

A very warm welcome to our full-range catalogue, presenting thousands of products available at competitive prices! From construction site equipment, welfare and power tools, to fixings and fasteners, ironmongery, workwear, adhesives and more, our comprehensive stock holding means we can provide speedy deliveries to your site, helping to keep your job on track.

3659 A4 ReadyFix Inside Pages, All v22.indd 2 21/06/2017 13:04

Readyfix Service

As a family-owned business with over 25 years' experience of supplying to sites, our priority remains the same - to offer a reliable, personal service to all our customers. We see this as vital to our ongoing success, plus we're always looking at ways to make it easier for you to deal with us. Our dedicated and knowledgeable sales team will provide a friendly and helpful service. If you require site visits or demonstrations, our sales representatives can provide in depth technical advice.

Huge Stocks

We understand that time on site is precious and speedy turnaround of goods to site is paramount, so that's why we aim for unrivalled stock support, holding large amounts of stock to get your orders delivered quickly. After a specialist product not shown in this catalogue? Give us a call and we'll aim to source it for you!

On Site On Time Delivery

We are committed to providing all the products you need on site and on time. Orders can be delivered NEXT DAY if ordered before 3.30pm, or if you're located within the M60 you can take advantage of our unique same day delivery for orders placed by 10am! (on stock items) In the unlikely event of items being out of stock, we will notify you at time of order and offer suitable alternatives, or a revised delivery time.

Order Collection Point

Want to get ahead and avoid the rush? Take advantage of our 'early bird' service – collections can be made from 6.30am Monday-Friday. In a hurry? You can phone ahead with your order and we'll have it ready for you to collect at our Fast Lane Collection Point.

Built-in Confidence

With a reputation built on service, quality, price, response and sound advice, it's no wonder that we are the preferred supplier to many of the construction industry's leading companies. With Constructionline and ISO9001 accreditation you have extra peace of mind that we are a reputable supplier.

Reasons to buy from Readyfix:

- FREE NATIONAL NEXT DAY DELIVERY*
- FREE SAMEDAY DELIVERY WITHIN THE M60**
- NO MINIMUM ORDERS
- HUGE STOCKS
- DEDICATED KNOWLEDGEABLE STAFF
- NO QUIBBLE GUARANTEE
- ORDER COLLECTION POINT OPEN FROM 6.30AM MONDAY – FRIDAY

*Next day delivery nationwide as standard on all in-stock orders placed by 3.30pm (except for some specialist items in which case you will be advised at time of order). Plus for urgent requirements we also offer next-day, guaranteed AM, timed or even same-day services. Our sales team will be happy to advise on costs and availability.

** All in-stock orders inside the M60 (Manchester Ring Road) placed by 10:00am will be delivered the same day.

EVO3® Safety Helmets

The EVO®3 Comfort Plus™ helmet combines a super strong shell for superior all day protection in the widest range of environments, with the comfort benefits of the new Evolution® 3D Adjustment™ harness system. EVO®3 is a true evolution of the long established MK2® and Mk3® helmets, which were first launched in the 1970's, the EVO®3 retains the JSP signature styling while incorporating developments first seen in the EVO®8. Packed full of the latest protection technology and features such as the Evolution® 3D Adjustment™ harness system, Revolution® Wheel Ratchet or the unique OneTouch™ Slip Ratchet, which can be adjusted using one hand in a single swift movement.

Screws - Woodscrews

C005-206

BZP CSK Pozi Multi Purpose Woodscrew

These hardened steel, bright zinc plated woodscrews have a cross recess drive which is ideal for using with popular power screwdrivers in all trades. The parallel, twin thread design provides a self centering point with fast positive driving. Due to the volumes produced we are able to provide a cost advantage on this product compared to the slotted version.

C301-106

Reisser CSK Industry Pack

Reisser R2 Countersunk - Recessed (Zinc and Yellow) Industry Packs Hardened Steel , Zinc and Yellow. Teflon Lubricated. Specially hardened steel gives the REISSER R2 screw the recognized tensile and torsional strength. The deep sharply rolled thread and the cylindrical shape prevent splitting and give greater retention.

Due to the strength a smaller gauge can be used than with twin thread screws.
The hardened head is manufactured with REISSER - RECESS to grip immediately without spinning, it also means that the screw can be removed easily.

The sharp thread and the sharp point bite instantly. Rough drilling is not necessary.
The REISSER surface finish of REISSER R2 screws provides excellent resistance against corrosion. The invisible Teflon coating saves energy and accelerates the screwing-in process.

BZP Dome Head Pozi Woodscrews

BZP Dome Head Cross-recess Twin-thread Woodscrews. Having the same fast, positive driving characteristics as the countersunk version these hardened round head cross recessed screws provide a neat finish where the fixture has no provision for a countersink. Ideal for powerscrewdriving.

Roofgrip Tek Screws

Roofgrip (RG) system for attaching single ply membrane and insulation to steel or timber decking.

- - 5.5mm and 6.3mm diameter, high shear and tensile strength
- - self drilling x point
- - Modified buttress thread - high pull-out resistance, reduced risk of stripping thread
- - Low profile head reduces damage to underside of membrane
- - Phillips No 3 recess - Positive and safe drive system
- - Grey / black spex coating - high corrosion resistence for long life
- - UEATC and FM4470 approved
- - Stress plates available
- - Heavy duty version available for fixing to concrete

Heavy Duty ONLY - for concrete decking, drill a 5mm diameter pilot hole into concrete to provide a minimum embedment of 32mm. The tapping hole must be minimum of 15mm deeper than the actual length of the screw.

Security Fixings

D731-400

Security Grille Anchors

We have included this item in our range due to an increasing demand for vandal proof and high security fixings.
Used for many purposes such as:

- Grilles and bars
- Security lighting and cameras
- Shutter doors
- Signs
- Garden and playground furniture
- Fencing etc

CSK 2 Hole Security Self Tapping Screw

Two hole security screws use a unique driving system which enables both insertion and extraction only by persons having the correct tool.
Ideal for areas where tamper resistance is paramount (e.g. Electronics, Alarm Systems, Office Equipment etc.) but enabling access to authorised persons.
They are supplied in A2 stainless steel in both machine screws and self tapping screws.

Sentinel Security Screws

Sentinel Security Screws are based on a supadrive recess but not allowing the screw to be undone. This is a very useful screw but is not suitable where periodic removal of the screw is required.The screws are hardened steel with a Bright Zinc Plated finish.

Raised CSK Pin Hex Security Machine Screws

Pin Hex security screws have been manufactured with an internal pin within the standard socket aperture. This prevents removal with standard hexagon keys. This system is suitable for medium torque applications and is one of the most difficult screws to remove without the matching driver.

BZP Shear Nuts

This effective but simple idea has been used for a number of years in all types of security applications.
The nut is tightened to a pre designed maximum torque load and the top hexagon part breaks off providing a high security finish to all types of bolts.
Can be used with standard bolts or some concrete anchor fixings.

D743-400

Stainless Steel Shear Nuts

A high security permanent nut fastening. The hexagonal part of the nut shears off at a predetermined torque (because only the cone part is threaded) leaving a tamper resistant cone. No specialist tools required, use standard socket or spanner. Manufactured in bright zinc plated (CR-3) steel, galvanised steel and A2 stainless steel.

Product Name	Code	Box / Pack Qty
M8	D743-400	100

D744-300

BZP Armour Rings

A simple conical collar which is hammered over any standard hexagon bolt head or nut, rendering it tamper resistant. This security fastener has the advantage of not being governed by torque and can be applied to existing fasteners. Another advantage of using the Armour RingTM is that it leaves a smooth cover to existing fixings.

Kinmar Permanent Security Nuts

A unique hi torque tamper resistant security nut that is a superior alterntive to a Shear Nut
A matching drive tool allows tightening to desired torque giving a permanent fastening
Ideal for use on concrete anchors, security fencing, playgrounds, street furniture, public transport etc.Also available in a torque resistant removable version.

BZP U-Bolts - Standard Leg

The dimension given for U-bolts is the nominal bore (N.B.) of the pipe. The actual distance between the legs is greater than this to allow for the wall thickness of the pipe. Extended leg U-bolts have approximately 50mm extra thread length on the legs than standard U-bolts. All our U-bolts are supplied with two hex nuts to suit.

BZP Serrated Flange Nuts

Zinc coatings prevent oxidation of the protected metal to create a longer lasting finish. It does this by forming a barrier and by acting as a sacrificial anode if this barrier is damaged. Zinc oxide is a fine white dust that (in contrast to iron oxide) does not trigger a breakdown of the substrates surface integrity.

Brass Wing Nuts

A wing nut allows the nut to be tightened by hand. While they cannot be tightened by hand as firmly as a conventional hex nut can be tightened with a wrench, they are far easier to tighten and loosen. They are generally used in applications that require frequent adjustments to bolt tightness or in situations wherein ease of use and assembly is most important. They are available in a wide variety of styles and materials.

Chemical Anchoring & Accessories

Polyester Resin

Polyester 10:1 (B701-110)

XP is a polyester based fixing resin designed as an economical solution for chemical anchoring in low exposure areas, with lightweight to medium loads. Particularly suitable for anchoring studs and bolts into hollow walls and masonry.

KEY FEATURES:
- Ideal for use in Low Exposure situations.
- Economical Fixing Resin.
- Medium Duty Load Applications.
- 300ml and 410ml Foil Bag Easy Opening Cartridges.
- For use in Hollow Wall, Brickwork and Masonary.

MAIN APPLICATION TYPES:
- Hollow Wall with Perforacted Sleeve
- Hollow Block with Perforacted Sleeve
- Masonry Fixings
- Close to the edge fixings
- Medium Load Fixings
- Areas of low exposure

B701-110

XPSF (B701-120) is a polyester based fixing resin designed for load bearing applications in brick, hollow, or aerated concrete. Designed without styrene for use in confined areas. Used for fixing bolts, posts, threaded studs and a variety of anchors.

KEY FEATURES:
- Ideal for Indoor Usage (Low Odour).
- 300ml and 410ml Foil Bag Easy Opening Cartridges.
- Medium Duty Load Applications.
- Non Flammable and Non-Hazardous.
- For use in Hollow Wall, Brickwork and Masonary.

B711-230

Epoxy Acrylate SF Resin

EPSF Is an epoxy acrylate based fixing resin designed for load bearing applications in concrete. This product is also designed without styrene for use in confined areas. Suitable for bolts, posts, threaded rods, studs and anchors. Ideal for outdoors use.

- Used in Wet Holes and Underwater.
- 300ml and 410ml Foil Bag Easy Opening Cartridges.
- Medium and Heavy Duty Load Applications.
- Non-Flammable and Non-Hazardous.
- Ideal for Confined Spaces (Low Odour)
- brick hollow concrete stone marble rebar wet.

410ml	B711-240	1

B721-310

High Performance Epoxy Resin

Approved for anchorings in:
- Heavy steel constructions
- Silo installations
- Tall shelving
- Sound barriers
- Jointers for concrete layers
- Rim beam anchorings
- Anchorings in diamond-drilled drill holes
- Fixings in waterfilled drill holes

Vinylester Resin Styrene Free

Buffalo VYLSF410 Vinylester SF Resin is a pure vinylester based European Approved fixing resin designed for high load bearing applications in concrete. This product is also designed without styrene to allow safe use in contained areas. Very high chemical resistance and durability. Suitable for bolts, posts, threaded rods, studs and anchors to install a massive variety of fixings. May be used in any kind of solid substrate for example concrete, stone, granite, marble, or brick. European Technical Approval (Option 7), High Load and Critical Loads, Guaranteed 50 years working life of anchor, Suitable for Underwater Applications. High Chemical Resistance.

B731-410

Buffalo ™ VYLSF410 Vinylester Resin Styrene Free - 410ml	B731-410	1

Vinylester Resin Cartridge

The Fischer FIS-V 360S is a styrene free, quick setting, high quality hybrid resin mortar. It is ideally suited to solid materials and, with sleeves, into hollow structures. FIS-V is unaffected by alkalines in concrete, has high temperature resistance, and does not shrink or deteriorate in bond strength.

B731-360

PUR400

PUR400 Pure Epoxy Fixing Resin designed for high load bearing applications in concrete. This product is solvent free with virutally no odour, to allow safe use in indoors or in confined spaces.

Suitable particularly for rebars and large diameter and deep threaded stud fixings due to its slow gelling action, and zero shrinkage.

Key Features:
- Used in Wet Holes or Underwater
- Ideal for deep embedment
- Longer working times, for use with rebar
- Highest Durability
- No Shrinkage Tested by Imperial College London Consultants

Buffalo ™ PUR400 Pure Epoxy Resin	B731-400	1

Chemical Anchor Capsules (Spin in type)

A high perfomance anchor system which chemically bonds a fixing stud to the base material without expansion stresses allowing closer centre to centre and edge distances than with conventional expansion anchors. Full technical and installation details are available on request.

Galvanised Chemical Anchor Studs

Chemical Anchor Studs Galvanised Chemical Anchor Stud (complete with nut and washer)
Heavy duty chemical anchor fixing. Finish: Galvanised.
Features and benefits

- Tough and reliable construction to cover most heavy duty fixing applications.
- Pre-cut to standard chemical anchoring lengths and supplied with nut and washer.
- Extremely durable galvanised finish for increased durability.
- Hex insert allowing rotation and chisel point to break chemical capsules.
- See fixing guide for drill size, maximum fixing thickness and resin usage.

Applications

- Suitable for use with both chemical capsules and injection resin.
- Particularly suited where fixtures require placing over the stud which could include racking, balustrades, hand rails, fencing and barriers in to concrete, brickwork and most types of masonry.

MSA Anchor Hex Flange Head

The MSA Multi-Substrate Anchor is a new concept in fixing technology. It provides the construction profession with the following benefits!

- Self tapping multi-substrate anchor
- Thread provides safe anchorage over full embedment of anchor
- Threaded anchorage is not subject to expansion presure and maintains its fix
- without preload
- No expansion gives close to edge fixing ability
- One piece fixing for ease of installation and reduced cost
- Uses standard drill sizes

Spit Hit Hammerfix Stainless Steel

The Hammerscrew is one of the fastest and inexpensive methods of fixing static loads that requires very little screwdriver work. The nylon sleeve is manufactured from durable polymide 6, which gives longer fixing life. This fixing can be used in concrete, solid bricks, lightweight concrete blocks, hollow blocks, rock and stonework.

- Through Fixing
- Pre-assembled
- Fast Installation
- Countersunk head allows
- flush finish
- Nylon sleeve is temperature
- resistant from 40o to +80oC
- High Corrosion Resistance
- with Stainless Steel Screw

Heavy Duty Anchors

BZP Throughbolts

B011-320

Through bolt anchors are designed for use in concrete or dense natural stone with a strength greater than 20N/mm2 and are probably the most widely used fixing bolt in todays market.

The throughbolt requires a hole in concrete the same diameter as the bolt, thus allowing the hole to be drilled through the fixture avoiding lengthy marking out procedures.

Throughbolts are a versatile, cost-effective anchor combining ease of installation with good load carrying capabilities.

When selecting any fixing bolts the following factors must be considered.
Thickness of fixture including any packing
Non-structural screed must be included in the fixture thickness
Compressive strength of concrete
Distance from any edge
Centre to centre distance of anchors
Type and direction of load applied.

Loose Nut Sleeve Anchors

These sleeve anchors are designed for fixing into brickwork, blockwork and concrete of 7 N/mm2 strength and above
This all metal anchor is a through fixing which enables the hole to be drilled through a pre-positioned fixture, saving time and money
Ideal in lighter weight situations
Supplied in zinc plated yellow passivated finish
Similar factors to throughbolts must be taken into account when selecting sleeve anchors with special care taken near brick edges, tops of walls etc.

BZP Lipped Wedge Anchors

The lipped wedge anchor provides an easy to install internally threaded fixing for use in concrete. Ideal for use in the suspension of building services from concrete ceilings
This product can in certain instances be used in hollow slab concrete ceilings, please phone our technical department for more information and advice.
The fixings should be set using the correct setting tool for an assured fixing.

FHY BZP Fischer Hollow - Ceiling Anchor

The FHY anchor has been developed specially for fastenings in hollow ceiling slabs of pre stressed concrete. The FHY can be used in slabs with a thickness greater than 25mm and of concrete strength B55. Can be used with bolts or threaded rods for suspending a variety of products and gives high load bearing capacity.

Loose Bolt Safety Plus Anchors

Heavy Duty are high performance through fixing anchors for concrete, providing maximum reliability in safety critical applications, even when concrete is cracked.
Features:

- High tensile grade 8.8 bolt
- Bolt size, drill size and minimum embedment depth indicator are marked on the anchor, therefore simplifying installation
- Integral controlled collapse and anti rotation feature ensures fixture is firmly secured
- Balanced expansion guarantees maximum load bearing in all situations
- Maximum strength and integrity even in fire conditions

Cavity, Helical and Insulation Fixings

Plasterboard Fixings

These Metal Self Drill Fixings are regular-duty. Fast and effective fixings for use in plasterboard.

Product Name	Code	Box / Pack Qty
Metal Plasterboard Fixing (C/W screws)	A631-420	100

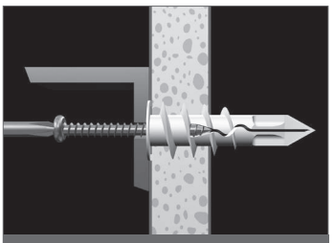

A631-420

Toggler Snapskru

Exceptionally strong!
Up to 80% more load than other reported self-drilling drywall anchors.
Accepts a range of screw sizes! Use 3.5, 4.0, 4.5 AND 5.0mm screws!
Built-in positive stop!
Prevents overdriving the anchor when using a screwgun.

Once it POP's you know its locked! Activates with an audible sound to feedback correct installation.
Remove the screw, without the anchor! Then re-install later, in the same anchor, with the same screw.
Resist vibration and shock! By locking its thread into the wall, Snapskru anchors do NOT pull loose when vibrated or shocked, nor do they pull out when the screw is removed!
The TOGGLER SnapSkru is not an ordinary self-drilling drywall anchor; it is in fact the only anchor that symmetrically locks on to the wall or ceiling for a truly secure fastening with up to 80% more holding power than conventional anchors on the market.
Every time you tug on a toilet tissue holder or a disabled handrail, or even a window blind, other self-drilling anchors come out as quickly as they went in, because nothing prevents their sharp threads from cutting back through the drywall. The SnapSkru anchor's built-in positive stop resists over-drilling and then opens with an audible pop, positively locking the anchor to the rear of the wall to resist vibration and shock. In doing so, the drywall gypsum and its paper is kept under compression, immediately reinforcing the anchor point and providing much greater holding power. Plus, the SnapSkru anchor allows the screw to be removed, without removing the anchor or damaging the wall!

Crack Stitching

B801-010

Crack Stitching System

This system is designed for the stabilisation of cracked masonry.

Product Name	Code	Box / Pack Qty
6.0 x 1000mm Crack Stitching Helical bar Stainless Steel	B801-010	10
6.0 x 1500mm Readyfix Crack Stitching Stainless Helical bar	B801-015	10
8.0 x 1000mm Crack Stitching Helical bar Stainless Steel	B801-020	10
3 Litre CSG - Crack Stitching Grout	B801-030	1
6 Litre Crack Stitching Grout	B801-040	1

1. Rake out or cut slots into the horizontal mortar beds, a minimum of 500mm either side of the crack

2. clean out slots and flush with clean water and thoroughly soak the substrate within the slot

3. Using the Pointing gun, inject a bead of grout along the back of the slot

4. Using the insertion tool, push one bar into the grout to obtain good coverage

5. insert a further bead of grout over the exposed Helical bar, finishing 12mm from the face, and 'iron' firmly into the slot using the insertion tool

6. Re-point the mortar bed and make good the vertical crack

Wall Ties

Helical Remedial Wall Tie - Type HRT

This is an excellent system for the replacement of wall ties, it is quick, requires no resin, minimal dust and making good to do. It is installed by simply drilling a 5.0-6.5mm (depending on the substrate) and driving the tie in using the SDS Fitting Power Driver.
Further sizes and technical details are available; please enquire.

B821-461

Product Name	Code	Box / Pack Qty

HRT 9.0 x 270	B821-476	100
HRT-PDA SDS Power Drive	B821-490	1

Helical New Build Cavity Tie - Type HNT

These ties are designed for securing the outer leaf of masonry to the inner skin.
The ties are ideal for use on thin joint systems as they overcome the misalignment of mortar beds. Installation is simple, in lightweight block they are just driven in or in bricks and concrete a small pilot hole is drilled and then they are driven in.
Further technical information is available on request.

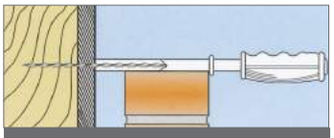

B831-461

Product Name	Code	Box / Pack Qty

B851-461

Helical Wall Starter Ties - Type HST

This range of ties is designed for applications where you are adding a new wall or securing a new leaf to an existing one. Installation is simple; you just drill a 6mm pilot hole into the existing wall and drive the tie into it using the hand support tool and a hammer.
Further technical information available on request.

Roof Ties

B861-337

Helical Warm Roof Fixing

The HRF warm roof fixing is a stainless steel fixing designed for use in pitched warm roof construction. It is driven in with a hammer or power-driven and twists its way into the material giving very good loadings without compressing insulation. Using the correct fixing size and length for the job is imperative so please contact our technical department for advice. For fixings over 125mm the Hand Support Tool or the Power Driving Tool must be used.
N.B. Popular sizes available from stock others available to order.

For Nail Guns see page 452

Bright NailFire® Nail and Fuel Pack

NailFire nails are designed for use in a wide variety of cordless 34° clipped head framing nailers and 16 gauge finishing nailers - and comply with the specifications for many of the tool manufacturers operating instructions.
All Products in the NailFire range are sold in one piece strengthened branded boxes for market appeal and instant quality recognition.
Framing nails are typically for structural work. Such as timber frame erection, roofing, stud wall partitioning and many more first fix applications. Exceptions to this would be fencing and decking.
The most popular compatible 34° clipped head nailers are:
Paslode IM350, Hitachi NR90GC2, Makita GN900S, Rawl WW90CH, Max GS690CH, Senco GT90CH, BeA Dynamic D90S.

Ring Shank Nails 34°

Features:
- Diamond Point for maximum penetration.
- Clipped head to increase the number of nails per strip and therefore reduce tool loading times.
- High quality paper to increase performance and reduce risk of nail jam.

Shank Design:
- Plain Shank: Low penetration resistance into all materials.
- Part Ring Shank: Partially ringed shank to provide low penetration resistance and improved pull-out resistance.
- Ring Shank: Provides a secure fixing with high pull-out resistance.

Dome Head Rivets

Standard rivets are blind rivets with a breaking mandrel. They are designed for the fastening, in a fast and simple way, of all kind of materials, when a especially high torque force is not needed.

Zedex CPT High Performance DPC

Visqueen Zedex CPT High Performance Damp Proof Course (DPC) is manufactured from co-polymer thermoplastic (CPT) providing all the characteristics necessary for it to perform effectively for the lifetime of the building in which it is incorporated.

- Excellent performance under high compressive loads
- Outperforms all other high performance flexible DPCs
- Low permeability to Radon and Carbon Dioxide gases

Visqueen Gas Barrier System

Gas Resistant DPC - Foiled Back

Visqueen Gas Resistant (GR) Damp Proof Course is a flexible polyethylene DPC with an aluminium foil designed to prevent the transmission of carbon dioxide, radon, methane and low level hydrocarbon vapours. This is in addition to the products usage as a damp proof course. Resistance to harmful gases is achieved by an integral aluminium film.

Integral aluminium foil for resistance to methane, radon, CO2 and low levels of hydrocarbon vapours.

- Easy to apply using traditional methods.
- Use as part of an integral Gas Protection System.
- Independently assessed.

Gas Barrier Membrane

Visqueen Gas Barrier offers a safe solution for the protection of buildings against methane, radon and carbon dioxide, when installed in accordance with the relevant codes of practice.

Visqueen Gas Barrier is a multi-layer reinforced polyethylene membrane with an integral aluminium foil that is approved for use in NHBC Amber 2 applications.

For ease of identification on site Visqueen Gas Barrier is coloured blue on one side and silver on the reverse. The barrier combines strength and performance with flexibility and easy installation.

Cavity Sleeves & Periscope Vents

Cavity Sleeves & Periscope Vents

Tough, flexible cavity sleeves and baffle and extension accessories, to provide ventilation through external walls to the building interior.

This product is always to be used in conjunction with Timloc airbricks (1201AB range).

2 sleeves may be joined together end to end and trimmed and telescopic extensions are available for wider cavity applications.

Expansion Thene

K845-105

Expansion Thene

Expansion thene is a closed cell expanded polyethylene foam supplied in sheet form or cut to slab depth/wall thickness as required. High performance expansion joint fillerboard, for concrete slab construction and brickwork joints, which is supplied pre-cut to depth of sealant for controlled void formation and easy removal.
Robust, non-absorbent with excellent recoverability of 100% from 50% compression, low load transfer, non extruding and resistant to attack by most acids and alkalis.

Insulated DPC & Cavity Closers

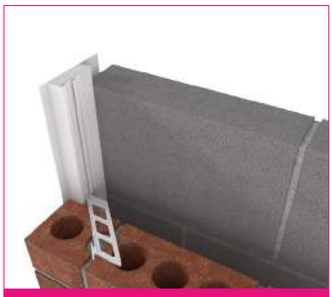

K809-165

Insulated Vertical DPC

A complete and simple solution to thermal bridging where the cavity is closed. Combining advantages of expanded Polystyrene and Polyethylene DPC, DAMCOR is designed to prevent the problem of cold bridging around window and door openings in traditional cavity constructions. At these points in the structure, condensation with possible consequential staining and mould growth, can occur at the reveals due to the lack of insulation where the cavity is closed.

Roof & Window Ventilation

K850-200

Continuous Soffit Vent Strip

Continuous soffit vent is a slotted vent strip that provides continuous eaves ventilation.
Suits soffit boards 6-10mm thick.

Size	Colour	Code	Box/Pack qty
2.4m x 10,000mm2	White	K850-200	1
2.4m x 10,000mm2	Brown	K850-201	1

G600-235

Round Soffit Vents (Plastic)

Mainly used in refurbishment, push-in soffit vents (primary roof vents); provide a convenient method of providing ventilation through an existing soffit board.

Barbed ridges on the sides of each vent grip the soffit board and hold them securely in place.

Each ventilator provides 1600mm² of free airflow and should therefore be positioned at 160mm centres in order to achieve the equivalent of a continuous 10mm opening.

Dektite Flexible Pipe Flashings

Dektite flexible pipe flashings conform to any sheet profile or roof pitch providing faster installation and dramatically reduced maintenance. When correctly fitted they eliminate all leaks and because they allow for movement between pipe and roof so there is no risk of seal breakdown. With a 20 year warranty Dektite flashings are the ideal method of sealing pipes and services from soil vents to heating flues.

Dektite Fixing Kits

One piece rubber flashing to accommodate the flashing of various pipe and flue materials to a range of flat or profiled roof and wall sheets.

Features

flexible sleeve - Dektite provides a close watertight compression fit around the pipe and a permanent seal at the base, eliminating costly call backs. Pleated Design - Accomodates various roof pitches and relieves stress at the pipe connection. Unique annular rings - Provide a key beneath for silicone sealant. Flexible aluminium base - Easily shaped by hand to suit a wide range of profile designs. Corrosion resistant - Made from EPDM or silicone rubber and aluminium, which is non-corrosive. Silicone rubber option - suits high temperature application. Cutting guides on sleeve which ensures correct compression seal around the pipe.

Standard Type - SH Joist Hangers - Masonry

The standard Single Piece Masonry Hanger is designed for building into brickwork or blockwork.

Wide top flange design offers increased loading capacity on masonry with a minimum crushing strength of 2.8N/mm2 and above. Hangers 150mm deep and over are manufactured 10mm less to allow for notching and regularisation of timber joists.

All hangers feature 75mm bearing surface and pre-punched side gussets to allow nail fixing into timber joists with 30 x 3.75mm sherardized square twist nails.

Herringbone Joists Strut

A superior alternative to timber strutting, Herringbone Struts offer a cost effective method of providing necessary lateral support to floor joists as required by the Building Regulations.

Fix to the top and underside of joists using the pre-punched holes.

Position at the centre of the span where joists exceed 2.5m long, or in two rows spaced at one third and two thirds of overall span where joist exceeds 4.5metres

Mortar Admixers

M401-020

Febmix DH Powder Plasticer

Febmix DH is a powder mortar plasticiser in a hand sachet pack form for use as an alternative to lime or as a supplement to lime to aid mortar workability in both brick laying and rendering applications. Improves frost resistance and reduces efflorescence.
Use 1 sachet per 25kg bag of cement.

Code	Box/Pack qty
M401-020	250

M401-025

Mortar Admix

Mortar Admix is an air entraining plasticiser that replaces lime in the mix to provide an easy to work butter like consistency to the mortar and to prevent shrinkage, cracking and crazing during the setting process. For use in brick laying and plastering mortars. Provides a degree of frost resistance and long term resistance to freeze-thaw cycles when set.

Size	Code	Box/Pack qty

Opti-Mix Admixtures

Opti-Mix Mortar Plasticiser is the world's first 1:25 plasticiser is just Pure Admix, smells and works like the best traditional Admix. Benefits include: superior plasticising action, controlled dosage, consistent mix design, easy to use, no waste. 1 litre is equivalent to 25 litres of standard product and 250ml is equivalent to 6.25 litres of standard product. Tested to BSEN934-Part 3.
Opti- Mix Integral Waterproofer is a plasticiser, waterproofing agent and salt inhibitor, all in one. It waterproofs, plasticises and retards has a controlled dosage, a consistent mix design and is easy to use with no waste. 1 litre is equivalent to 25 litres of standard product.
Opti-Mix 3-in-1 render additive is a plasticiser, waterproofing agent and salt inhibitor designed specifically for use with renders. It waterproofs, plasticises and retards has a controlled dosage, a consistent mix design and is easy to use with no waste. 1 litre is equivalent to 25 litres of standard product.

Integral Waterproofer

Integral Liquid Waterproofer is a liquid additive that provides long term water protection to mortar, concrete and rendering. Reduces water permeability and is suitable for all applications where resistance to water absorption is necessary such as pool and tank linings, roof areas, external rendering and pointing and structures below ground level.

Size	Code	Box/Pack qty

Evercryl One Coat Waterproofer

Evercryl is a resin based, fibre re-enforced roof repair compound which is effective on all common roofing surfaces, giving instant roof repairs even in the wet and on wet surfaces. May also be applied in frosty conditions down to -5C. Evercryl is instantly waterproof when applied, there is no fear of wash off so emergency leaks can be tackled immediately as there is no need to wait for the rain to stop. Everycryl is brush applied and dries to a smooth seamless flexible membrane which resists algae and fungal growth. Because of the high level of fibre re-enforcement.

Epoxyset 3 Part Mortar Repair

EpoxySET 105 is a three part general purpose repair mortar based on epoxy technology. Formulated to withstand chemicals, impact and abrasion and can be used to repair concrete, screeds, stone, brick and steel in even the most demanding domestic and industrial situations. EpoxySET 105 is the ideal product for repairing floors, steps, kerbs and cills. Pack includes finishing solvent and gloves.

EpoxySET 106 is a three part, rapid setting, high strength repair mortar based on epoxy resin technology. Formulated to withstand chemicals, impact and abrasion and can be used for rapid repairs to concrete, screeds, stone, brick and steel in even the most demanding domestic and industrial situations, especially where same day trafficking is required. Pack includes finishing solvent and gloves.

Wood Treatments

Wood Preserver

Wood Preservers are a range of solvent based solutions of active fungicides specifically designed to deeply penetrate all wood and joinery to give long lasting protection. Wood Preserver Clear is an ideal pre-treatment which may be overpainted, varnished or stained. Wood Preserver in colours provide the same protection as clear but as they are a finish in their own right, with water repellent properties, they should not be overcoated.

5 Litre Clear Wood Preserver
Lumberjack Wood Preserver is a low solvent, low odour solution based on Micro-fine active technology. The fungicides and algaecides present in these formulations are finely dispersed so that wood penetration and hence effectiveness is much greater than standard wood preservation products. In addition the use of ultra light fast pigments on the coloured variants give an even fade resistant finish which will last for years.

Triple Action Wood Treatment takes care of remedial wood treatment and preservation in one can. It is specially designed to deeply penetrate all wood and joinery to give lasting protection from damage caused by wet rot, dry rot, fungi and wood boring insects/larvae. Kills, Protects, Preserves. Micro Fine Actives Penetrate Deep into the Wood.

Woodworm Killer is a ready to use treatment for the eradication of all types and life stages of wood boring insects and their larvae, specifically woodworm. The added insecticide also aids to actively kill the woodworm and protect against re-infestation. Low Solvent. Low Odour. Low VOC. Micro fine actives penetrate deep into the wood.

Black Bitumen Paint

- Black Bitumen Paint solvent based full bodied black bitumen paint,
- Provides an effective waterproof, weatherproof, corrosion resistant protective coating
- Suitable for the protection of metals, concrete roofing, felt, fibre cement, corrugated iron, asphalt & wood against water attack.
- Fast drying.
- Suitable for use with portable drinking water tanks.
- Resistant to low concentrations of alkalis and acids and can withstand prolonged oxidation
- Metal protection - corrugated iron sheets, fire escapes, stairways, ladders, storage tanks, gutters, down pipes, fences, railings, gates etc.
- Protecting drinking water tanks.
- As a protective coating for concrete structures, stone, brick, concrete screeds and sand cement surfaces.
- Overcoating felt wood.

Adhesives

L481-200

L481-210

StrongGrip™

StrongGrip is a revolutionary new direct bond cartridge applied adhesive formulated specifically for the professional user, using polymers at the leading edge of adhesive technology. StrongGrip™ bonds to virtually all common building surfaces and is designed for both external and internal use.

BENEFITS

• Enhanced slump resistance for quick and simple direct bonding to most substrates without the use of temporary supports in most applications.

• Excellent early and ultimate adhesive strength on both porous and non-porous substrates.

• Excellent gap filling properties to accommodate uneven surfaces.

Thixotropic

This non-drip, non-stringing contact adhesive has Thixotropic (the property of certain gels or fluids that are thick or viscous under normal conditions, but flow or become less viscous over time when shaken or agitated) as a main formula that allows slight adjustment of small areas.

This contact adhesive is ideal for vertical and overhead surfaces, has high strength with a permanent bond, and low odour.

BONDS: Decorative laminates, Rigid PVC, Wood, Chipboard, Hardboard, Cork, Leather, Rubber, Stone, Metal, Dense film fabrics, Ceramics, Glass.

(Not suitable for use on polystyrene or cellulose painted surfaces).

Maximum Torque Adhesive

Maximum Torque, based on next generation hybrid polymer technology is the ultimate high grab adhesive, providing a level of immediate grab strength not previously possible with cartridge packed adhesives. The unique polymer blend used in Maximum Torque gives incredible initial grab, typically double that of most grab adhesives on the market today, eliminating the need for temporary support in most applications. Maximum Torque has the ability to bond basically EVERYTHING to ANYTHING in virtually all conditions. Where other adhesives promise to replace Nails and Screws, Maximum Torque even replaces Nuts & Bolts in many applications.

Airblock Foam

AIRBLOCK Flexible foam helps fill voids and seal the gaps where air leakage most commonly occurs where building services enter and leave the building (such as electrical cables vents and pipes), gaps around windows and doors, around suspended floors and loft hatches, even through light fixtures. Because it is a high performance polyurethane foam it will fill and seal most construction materials and remains flexible to absorb movement after it has cured. It can be cut, sawn, sanded, painted or plastered over after application.

Fillers

M251-235

B1 Fire Foam

Firefoam is a quick setting fire rated, one part polyurethane foam, it expands on application to yield up to x50 that cans original contents and meets the test criteria BS476 Part 20. The Firefoam has been fire rated for up to 4 hours in certain joint configurations, once cured the foam can be cut, sawn or plastered over after approx 1 hour, the foam is also gap filling, quick curing and adheres to plastic, brick, stone, timber, metals, concrete etc.

Product Name	Code	Size	Box / Pack Qty
B1 Handheld Pink	M251-135	750ml	12
B1 Gungrade Pink	M251-235	750ml	12

M262-235

B2 Fire Foam

Schtuk PU B2 Fire Foam is a one-component, self expanding, ready to use polyurethane foam. It contains CFC-free propellants, which are completely harmless to the ozone layer. It has a fire rating to B2 (DIN 4102-Part 2) and has been tested and approved for soundproofing by 'ift Rosenheim'.

Characteristics
- Excellent adhesion on most substrates (except PE , PP and Teflon)
- High thermal and acoustical insulation
- Very good filling capacities
- Excellent mounting capacities
- Excellent stability (no shrink or post expansion)

Applications
- Installing of window- and doorframes
- Filling of cavities
- Sealing of all openings in roof constructions
- Creation of a soundproof screen
- Mounting and sealing of window- and doorframes
- Connecting of insulation materials and roof constructions
- Application of a soundproofing layer on motors
- Improving thermal isolation in cooling systems

Heavy Section Channel

This channel support system range has developed over many years to cover a wide variety of support applications in the electrical, mechanical, ventilation and construction industries. Typical applications include cable support, pipework brackets, suspended ceiling sub grids, operating theatre support framework, racking systems and numerous other projects.

Channel Nuts

Channel nuts are vital to the channel support system. They are inserted through the open side of the chanel then rotated through 90° where their toothed grooves fit against the return flange of the channel. The sprung versions will hold themselves in position as opposed to the plain channel nuts are pre-mounted on any bolt prior to insertion. The suffix of the code refers to the metric thread size.

Product Name/Description	Code	Box/Pack qty
CKPS6 Universal 30/15 Channel Nut - 585430	R631-395	100

Adjustable Stud Wall Fixing Bracket

Can mount multiple boxes. Notched and marked for easy identification and bending. Improved design with stamped inch markings and pilot holes accelerates precise box conduit mounting between studs. Pilot holes allow easy box attachment with a screwdriver. Requires only a screw gun to install. Can be mounted to face or inside of stud. Adjustable for non-standard stud spacing. Interlocking tab prevents accidental disassembly. Unique, one-piece, break apart design.

Pipe Clips & Spacers

These Nylon Special Flat Washers are available in a large selection of sizes and can also be used as spacers or insulators.

Manufactured from tough, lightweight nylon, these fasteners can be used as a washer between rotating or moving parts. Excellent anti-vibration properties mean that these parts are also effective as cushioning washers

Type HB Hollo-Bolt

The Lindapter Hollo-Bolt is a patented method of securing to square, rectangular or circular hollow section steel, or to conventional steelwork where access is available from one side only. The Hollo-Bolt offers a tremendous reduction in installation time and costs over traditional methods.

S201-204

HBSS-Stainless Steel

The Hollo™ Bolt is ideal for connecting to hollow section steelwork. Its simple installation procedure can offer tremendous savings over other methods whilst offering an aesthetically pleasing finish. The Hollo™ Bolt also offers high load bearing capabilities.

Type FF Floor-Fast

The product consists of a malleable iron body casting with a countersunk socket screw; the eccentric stepped web of the casting allows it to lock under the steelwork providing full face contact when torque is applied. BZP finish.

Door Closers

Style and performance come together in the TS.3204 Rutland door closer range. Having a power size from EN2,3,4 by position, CE marked, and classified to meet and exceed the European standards make it an ideal door closer for the mid range contracts.

These closers are tested to 120 minutes in successful EN 1634 fire tests.
Whilst maintaining the feature benefits of the MkI model the new Mk2 version is now suitable for use on double rebated fire doors.

Features
Surface mounted easy-fit
Suitable for use with power size 3-5 door closers
Suitable for use on timber doors of any width up to 1220mm and all standard thickness
Suitable for rebates up to 25mm

Panic Hardware

G500-040

G500-050

Panic Bolts & Latches

The Exidor 293 is an elegant and highly functional push pad panic bolt set for use on single fire escape and single emergency exit door applications. Push pad design with top and bottom vertical shoot bolts. From the Exidor 200 range. Silver (SE) finish.

Tested to BS EN 179 this emergency escape device is only suitable for use where the emergency exit door is used only by trained personnel.

The Exidor 293 should only be used in low occupancy places of work (an area of less then 60 people) and areas never accessed by members of the general public or those unfamiliar with the operation instructions. (For example this item should only be fitted in office areas or factories where personnel have been trained and regularly practice a fire drill.)

This item is NOT suitable for use in public buildings and public areas (areas with 60 or more people).

Door Hinge Finger Protector

The integrated safety hinge which prevents finger trapping through clever design.
The hinge pivots the door at the top and bottom, which maintains a small, constant gap at the hinge side of the door thus minimising the chance of fingers being jammed.

Fischer Coated Panel System

FCPS is designed to prevent the passage of fire and smoke through compartment walls and floors whilst still allowing installation of services.

The system has been tested in accordance with BS476 pt 20 and EN1366 pt 3, providing a fire and smoke barrier for up to 4 hours.

FCPS consists of 1200x600x 50mm 140kg /m3 stone fibre core panels that are coated with FPC ablative sealant on both sides. fischer FiAM is used to bond and seal the system and at normal temperatures, the FCPS Panel installed with FiAM sealant remains flexible to permit thermal and mechanical movement of the services.

Intumescent Fire Strip

Certifire Approved Fire Seals & Smoke Seals. Passed at BS476 Part 22 & 31.1 - 30 or 60 minute rated types. Intumescent fire and smoke seals for fire door assemblies.

An intumescent graphite based fireseal contained within a PVC sleeve for fitting into a rebate to either the leaves or the frame of a door.

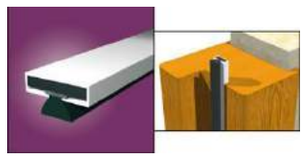

In the event of a fire the seal expands (intumesces) to many times its original volume and seals the gap around the door to provide a safe and effective barrier against the passage of fire, smoke and hot gases.

Astroflame Intumescent Fireseals are available with or without a cold smoke seal in the form of a nylon pile.

Astroflame smoke seals provide a permanent barrier to smoke - particularly important as smoke fumes travel faster and further than the fire itself. They also have acoustic and thermal applications.

All ASTRO fire and smoke seals are supplied with a self-adhesive backing tape as standard to facilitate quick and easy fitting.

Tested for 30 minutes with 10mm and 15mm to BS 476 part 22 & 31.1.
Tested for 60 minutes with 20mm 25mm and 30mm to BS 476 part 22 & 31.1.
Smoke seal tested to 100,000 cycles.
NHBC Type Approval.
PLEASE NOTE; BRUSH STRIP COLOUR IS GREY AS STANDARD

FJ50-332

Worktop Connectors

Manufactured in bright zinc plated steel these worktop connectors provide a strong connection when making butt end or corner joints in worktops. They are designed to utilise a 35mm hole (compatible with concealed hinge recess sizes) together with a connecting slot routed between the hole in each worktop.

Size	Finish	Code	Box / Pack Qty

L051-199

L051-200

Worktop Joint Sealants & Thinners

Bonds and seal worktop joints. Resistant to cleaning chemicals and bacterial mould growth. Solvent free.

Use ColorFill Solvent to clean off any excess ColorFill that has squeezed out of the joint. Moisten a tissue with ColorFill Solvent and clean across the joint at 90° to the cut to avoid dislodging any ColorFill still setting in the joint.

Jointing Biscuits

Trend biscuits are made of die cut beech. Beechwood biscuits which expand when in contact with a woodworking adhesive such as PVA glue.They are ideal for strong, fast, and accurate jointing of hard and soft woods, plywood and composition board. Compared to doweling, biscuit jointing is faster and more precise.

Q/G5062QC

Quick Change Bar Clamps

A quick change system which converts clamp to spreader in seconds. The quick-change now provides the consumer with a greater clamping hold load of 135Kg.
Revolutionary in design. Fast and easy to operate. The One Handed Clamp solves the major clamping problem of not having enough hands for the job by freeing one hand to position the work. High tech resin body, sturdy and temperature resistant. 70Kg clamping hold load makes for a perfect lightweight 3rd hand.

Mini Clamp only - Mini clamp is also ideal for smaller jobs and applications in tight working areas. The non-marring, stay-on pads protect the work surface. Size: 150 mm /6in twin pack.

Q/GXP12

Xtreme Pressure Clamp

The Irwin Quick Grip clamp is designed with strength and reliability in mind and offers a clamping pressure of 250kg. It is manufactured from Investment Casting which is stronger than sand casting with a 3 component handle and soft grip feature for comfort. The I - Beam design provides high mechanical grip while the removable pads give the jaws excellent grip on the job with reduced marking of the work piece. A tool-free quick change function allows the jaws to be reversed to perform a spreading action.

MON15PC

Monument Automatic Copper Pipe Cutter

Monument automatic pipe cutter is ideal for cutting copper pipe in confined spaces. A tough ABS housing covers the steel mechanism which takes any strain. Easy to use it cuts once the gate of the tool is closed over the pipe. Cuts in two directions. To ensure long life, occasionally dis-assemble the tool and clean away flux residues and other dirt. NOT for use on stainless steel. This automatic pipe cutter is ideal for cutting copper pipe in confined spaces. A tough ABS housing coves the steel mechanism which takes any strain. Easy to use it cuts once the gate of the tool is closed over the pipe. Cuts in two directions. Ideal for cutting 15 mm outside diameter copper pipe.

BAH1520G

Bahco Ergo Side Cutting Pliers

The Bahco ERGO™ Side Cutting Pliers are made from high performance steel, with a black anti-corrosion finish and edges which are induction hardened at 62 HRC. They have two-component combination handles - thermoplastic surface on tough polypropylene which gives a superior grip. Progressive edges allow the cutting radius along the edge in order to cut hard material like piano wire close to the joint and soft materials like copper and plastic insulated wire at the tip. The screw joint provides excellent running and accurate alignment of the cutting edges.

VISE Grip Curved Locking Jaw Pliers

These IRWIN Vise-Grip WRC Curved Jaw Locking Pliers are ideal for a variety of applications and material shapes. They are made from high-grade heat-treated alloy steel for maximum toughness and durabililty. The hardened teeth are designed to grip from any angle, and the curved jaw shape is better for fitting around curved work shapes.

The pliers classic trigger release provides maximum locking force. The hex key adjusting screw tightens to adjust pressure and draw materials together and also provides a controlled release.

The Bahco SL25 is a handy 1/4 inch drive socket set complete with 12 sockets made from hardened chrome vanadium, a bit set with a dynamic drive profile
and a quick release ratchet.

Ideal for the home, garage or car this Bahco SL25 socket set will give years of service as it is made from a hard wearing steel material. The set has all the most
common sized sockets, so the set is well equipped to tackle any job in or around the home. It is especially suitable for the motor trade.

This Bahco SL25 also has a compact sturdy soft-grip handle with a thumb slide direction lever, a 1/4in 100mm extension bar for hard to reach places, 6 piece

Torx bit set for security type bolts, 2 x PH2 standard screwdriver bits and 2 x Hex drive bits.

The Bahco SL25 is supplied in a sturdy high density polythene carry case with sponged lining that is labelled with the corresponding items for quick and easy identification.

Set contains:
- 1 x High density polythene (HDPE) case.
- 12 x 1/4in Hex sockets 4, 4.5, 5, 5.5, 6, 7, 8, 9, 10, 11, 12 and 13mm.
- 1 x ratchet 1/4 in compact length (only 125 mm) with two component handle, and quick release button.
- 2 x bit 1/4in PH2.
- 2 x bit Hex 5 & 6mm.
- 6 x 1/4in Torx bits TX10, TX15, TX20, TX25, TX30 and TX40.
- 1 x bit holder 1/4in with locking spring, 1/4in female square.
- 1 x 1/4in Extension bar, length 100mm (4in).

Hand Mitre Shear Handtools

HM/SHEAR

Hand Mitre Shear Handtool

With 45 degree angled angled wings.
For perfect mitre cuts of seals, mouldings, beadings and weatherseals.
Can be used to cut mouldings at 90 degrees up to 10mm thick.
For battens at 45 degrees the maximum thickness is 15mm and 35mm wide.
Left and right hand use.
With stop faces at 45 degree. Suited to mitre cuts in tiling sealing strips, wooden battens and decorative trim strips.
Engraved angle lines on both left and right alloy wings at 45 deg, 60 deg, 75 deg, 90 deg, 75 deg, 60 degnad 45 deg.
For use with wood, PVC, synthetic and leather.
Ideal for use with delicate dolls house mouldings.
Blade can be changed by using an 8mm A/F spanner.

Stanley Fatmax Waterproof Toolbox 23”

The Stanley waterproof tool boxes features an all round water seal which ensures safe and dry storage. The box is constructed of structural foam for extra strength and has extra large storage capacity.

The portable tote tray is designed to carry tools and small parts, yet enables large tool storage inside the tool box as it is 3/4 length.

An integrated V-groove on top of the lid enables sawing when needed and it is also suitable for working with pipes and lumber. The tough ergonomic soft grip handle allows heavy loads to be carried with ease and the large metal rustproof latches provide secure closing.

Stanley Galvanised Metal Toolbox

These heavy-duty tool boxes are ideal for use on the worksite, garage or around the home.

They have a centre galvanised finish, this gives the tool box a sturdy durable construction and is also rust resistant, as are the two heavy-duty metal latches.

They have a removable plastic tray which is ideal for smaller tools like screwdrivers, spanners etc, or tapes and fixings that can be found at a glance. The lid incorporates a saw groove for holding pipes and timber for cutting when there is no work bench available.

The lid on has a honeycomb design to give it extra strength and durability, and the soft grip handle folds flat in to the lid when not in use.

Features & Benefits:
- Heavy duty toolbox - ideal for the worksite.
- Galvanised finish - rust resistant
- Heavy duty metal latches
- Removeable tote tray
- Toolbox lid features integrated saw groove - for cutting timber, pipes etc.
- Honeycomb lid design for extra strength and rigidity
- Bi-material easy grip handle for secure hold even when wet

Faithful 150mm Digital Callipers

Manufactured from hardened stainless steel, this three function electronic digital calliper provides precision readings through a clear liquid crystal display. Its many features include a fine adjustment roller which allows precise measurements to be taken quickly and easily. The digital section button enables readings to be displayed in either metric, imperial (decimal) or imperial (fractional) format. The four-way measurement function provides a choice of readings in external, internal, depth and step modes. The strong plastic storage case enables the calliper to be kept in a dust and damp free environment, protected from direct sunlight and high temperatures. 150 mm (6in) Graduations: 0.01 mm (0.0005 in)

Grease Gun

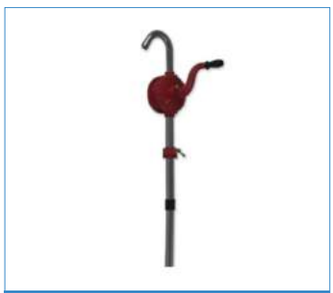

FAIGGHD

A heavy-duty side lever grease gun that develops up to 10,000psi - 690bar of pressure. The gun features an aluminium die cast head with an easy locking plunger system and ergonomic pump handle grip. The positive grip plunger handle, and the bulk loader system with an air release valve, combine to make this grease gun very efficient and easy to use.

A variable lever stroke feature is built-in for use in confined areas and the four jaw hydraulic coupler ensures that the grease goes exactly where it is needed at the press of the lever. With a 500g (16oz) capacity, the gun can be bulk filled by its suction action but will also accept 400g grease cartridges.

BOSGF33PTU

33 Paper Cordless Stick Nailer 90mm 7.2V Bostitch

The Bostitch GF33PT-U 90mm Cordless Papertape Framing Stick Nailer with serrated tip has a balanced design and fast recharge time and can drive 50-90mm Papertape collated stick nails from 2.5 to 3.3mm diameter.

- Nail range: 50-90 mm.
- Diameter: 2.5mm - 3.3mm.
- Magazine capacity: 42
- Adjustable depth control.
- Battery voltage: 7.2 V.
- 2-year warranty.
- Weight: 3.2 kg.
- Dimensions L x W x H: 347mm 353mm 110mm.
- Working Ambient Temperature: 0-40 C.
- Charging Time: 60mins.
- Battery Type 1.4Ah Ni-Cd 7.2V.
- Fuel Cell 80ml.
- Noise LPA 1sd 99.0.
- LWA 1sd 108.0.

LTX2.1.6

Metabo LTX Twin Pack COMBOSET - Hammer Drill & Impact Driver

This Metabo SB18LTX Cordless Combi Hammer Drill and SSD18LTX200 Impact Driver Twinpack uses high capacity 4.0Ah batteries for longer operating time per charge.

The combi hammer drill has a selectable ‘impulse’ mode and has variospeed electronics. It’s high performance impact mechanism provide excellent results. The drill features Precision Stop, where torque coupling with precise electrical switch off help to ensure an extremely long lifetime for the tool. The spindle has a hexagon recess for screwdriver bits, and an integrated work light provides better visibility. The SB 18 LTX has die-cast aluminium housing.

The SSD 18 LT/LTX Impact Driver has the following features: Max. Torque (setting 3) 160Nm Max. Torque (setting 2) 125Nm Max. Torque (setting 1) 80Nm Speed at No load (setting 3) 2,650 rpm Speed at No load (setting 2) 2,150 rpm Speed at No load (setting 1) 1,600 rpm.

The robust battery packs have a capacity display, and patented AIR COOLED technology provides speedy charging and long service life. The batteries feature Metabo ULtra M technology - intelligent battery management for long-lasting battery packs.

Metabo’s 3 year guarantee covers the machines, batteries and charger when registered on the Metabo online XXL warranty portal.

Metabo COMBOSET 2.1 - 10.8V PowerMaxx BS Quick & PowerMaxx SSD

COMBO2.1-10.8V

This Metabo 10.8v Twinpack is a powerful and compact solution, ideal for tight and narrow spaces.

The PowerMaxx BS Quick has an overall length of 175mm. Furthermore the 10mm Quick chuck can be removed to reveal a hexagonal recess in the spindle for screwdriver bits, reducing the overall length to 122mm. The drill has a two speed gearbox delivering an impressive 34Nm of hard torque and a maximum speed of 1,400rpm

The PowerMaxx SSD 10.8 is a lightweight and compact impact driver with an impressive 105Nm of torque and 3,000rpm

The kit comes complete with an angle attachment for the BS Quick, 2 batteries (1x4.0Ah & 1x2.0Ah), charger & Carry Case

Metabo's 3 year guarantee covers the machines, batteries and charger when registered on the Metabo online XXL warranty portal.

Metabo 18V 3.1 Ah LiHD Battery

625343000

LiHD – a completely new dimension in technology. The combination of new high-performance battery cells and completely newly developed components in the pack ensure that maximum power remains available for an extremely long time. The revolutionary LiHD high-performance cells have a completely new electromechanical design with significantly stronger conductors, which in combination with more active material, permit a significant increase in the accessible power output, resulting in more usable energy for you. The LiHD batteries offer 67% more power, 87% longer run time and 100% longer service life.

- 67% more power – permits completely new applications with battery powered machines
- 87% longer run time – for even more endurance
- 100% longer service life – makes your investment even safer
- Makes applications possible under most demanding conditions, which had previously been reserved only for powerful mains-powered machines.
- New definition of independence: a milestone along the path towards a cordless construction site
- 100% compatible and fits all current and future cordless machines from Metabo

Technical Specification:
- Type of battery pack - LiHD
- Voltage - 18v
- Battery Capacity - 3.1Ah

625527000

Metabo 18V 4.0 Ah Li Power Extreme Battery

Metabo 18 Volt 4.0Ah Li-Ion Battery uses a floating battery cell storage system that protects the cells from damage caused by blows or bumps and ensures a longer service life. Also has a capacity indicator in the form of 4 LEDs, showing you the level of charge, with the touch of a button.

This battery pack features Metabo Ultra-M technology:

- Intelligent battery management, all relevant information is stored on the microchip of the battery pack. This microchip communicates with the electronics of the machine and the charger and ensures an efficient and gentle charging process as well as ideal energy usage when working - for maximum power and service life!
- Electronic Single Cell Protection (ESCP), this protects each and every battery cell from discharging completely and from overcharging - for extremely long battery life.
- Patented AIR COOLED charging technology, the battery pack is cooled by a fan in the charger - for shorter charging time and longer service life.

Makita 13mm Rotary Percussion Drill

- Max in masonry 20 mm
- Input wattage 850 w
- Blows per minute 0 -22500 bpm
- Max in steel 13 mm
- Max in wood 30 mm
- Vibration drilling 2.5 m/sec
- Vibration hammer drilling 9.5 m/sec
- Max dry diamond core 152 mm
- No load speed 0 - 1500 rpm
- Vibration K factor 1.5 m/sec
- Noise sound power 105 dB(A)
- Noise sound pressure 94 dB(A)
- Noise K factor 3 dB(A)
- Heavy duty construction - ideal for site work
- Percussion action for drilling pilot hole.
- Rotary action for dry diamond core drilling.
- Torque limiter to prevent operator injury if the core bit snags.
- Excellent for plumbers, electricians, general contractors, hirers.

KHE2650240V

Metabo SDS MAX Combination Hammer 1300W 6.7kg

- SDS Max Hammer. With the appropriate accessories, it is also suitable for bits and accessories with spline shank or ratio thread
- Rotation stop.
- Metabo VibraTech (MVT): reduced vibration levels and therefore less impact on joints due to the integrated damping system on the handles.
- Additional handle can be fitted to three places on the housing.
- Optional 30% impact reduction setting for working with more pliant materials.
- Vario Tacho Constamatic (VTC) full-wave electronics.
- Electronic soft start for precise spot-drilling.
- Torque limiting clutch.
- Stoppable switch for trouble-free chiselling in continuous operation.
- Chisel can be fixed in 12 positions.
- Auto-stop carbon brushes.
- The service display, for example, indicates when the carbon brush needs to be replaced, plus an LED indicating mains voltage.
- Torque : 90Nm.
- Drilling capacity in Concrete: with hammer drill bits: 45 mm, with router bits: 65 mm, with core bits: 100 mm

SBE1100110V

Metabo Impact Drill 110V 1100W

The NEW SBE 1100 Plus is Metabo?s top of the range impact drill with a 1,100 Watt motor. With more torque andmore blows per minute, the SBE 1100 Plus outperforms all other machines in the current 1,000 Watt class, even thosewith up to 1,300 Watt motors. Features include: VTC electronics for speed stabilisation under heavy loading. Overloadprotection, re -start protection, carbon brush wear indicator. A strong aluminium die cast gear housing with mechanicalsafety clutch for machine and operator safety. A two speed gear box and impact or rotary only modes. A pro end FuturoTop double sleeve keyless chuck. A variable speed trigger with speed dial for precise speed selection. Metabo long lifeMarathon Motor with auto -stop carbon brushes. With 43 mm collar so can be used in pillar drill stands.
Supplied in Metabo Carry Case.

5704RK110V

Makita 5704R 165mm Circular Saw 110V

Lightweight yet powerful and can perform an impressive 66mm depth of cut, low noise and reduced vibration help to increase user comfort especially in prolonged use and its a nicely priced circular saw with impressive specification - hence why this model is one of the UK's most popular.

- 190mm blade diameter
- Steel base and guard
- Quick release height adjustment
- Max cut at 90 degrees 66mm, 45 degrees 46mm
- Ideal for general timber cutting
- Dust extraction facility
- Powerful motor
- 1200W power input
- Load speed 4,900 rpm
- Net weight 4.9kg

CS23-355110V

Metabo Metal Cutting Chop Saw

- The CS 23 - 355 is powerful 2,300 W Metal cutting chop saw.
- Designed for use with abrasive wheels this machine will produce precise cuts in steel, non -ferrous metals, iron and cast profiles.
- Coupled with high performance statistics this machine has been designed with ease of use and transportation in mind.
- Disc diameter 355 mm
- Bit retainer, diameter 25.4 mm
- No load speed 4,000 rpm
- Rated input power 2,300 W
- Maximum cutting dimension
- Bar steels 65 mm
- Pipes 125 mm
- Shaped steels 115 x 130 mm
- Maximum opening of vice jaws 238 mm
- Dimensions of the base plate 468 x 282 mm
- Transport height 400 mm
- Weight 16.9 kg

Makita Jigsaw With Job Light

4350FCT110V

- 3 orbital settings plus straight cutting with powerful 6.3 AMP motor for cutting in all varieties of materials
- Variable speed control dial (800-2,800 SPM) enables user to match the speed to the application for superior results
- “Tool-less” blade change system for fast and easy blade installation and removal
- Uses Tang shank blades
- 40% less tool vibration with the lowest noise level in its class
- Built-in LED light illuminates the line of cut for increased accuracy
- Electronic speed control maintains constant speed under load
- Soft start feature for smooth start-ups
- Die-cast aluminum base adjusts up to 45% right or left and positive stop at 90% for solid cutting performance
- Built-in dust blower clears the line of cut for improved visibility
- Ergonomically designed rubberized top handle grip for added comfort
- Onboard hex wrench for fast, accurate bevel adjustments

Fein Multi Master Quick Start Kit

The universal system for interior work and renovation with QuickIN and the basic accessories needed for sanding and sawing.

- Self-supporting motor with vibration decoupling for outstanding vibration and noise reduction.
- Very powerful 350 W FEIN high-power motor for maximum cutting speeds and work progress.
- Maximum quality and stability thanks to metal gearbox head and consistent use of ball / needle bearings.
- Convenient QuickIN quick clamping system.
- Electronic speed setting with tachogenerator for constant speed even when loaded.
- Integrated interface for attaching additional system accessories.
- Optimum handling thanks to soft grip zone.
- 8-star tool mounting with excellent torque transfer.
- Wide range of accessories available for all applications.
- Input : 350 W
- Oscillations : 10,000 - 19,500 rpm
- Weight (according to EPTA) : 1,4 kg
- Cable with plug : 5m
- Sanding pad width : 80mm

F50-842

Fox Dust Extractor 240V

The heavy duty F50-842 is aimed at the professional user whose extraction demands outstrip the capacity of smaller, standard machines. Featuring a full 2Hp motor and a high capacity 160 Litre waste collection bag for heavy usage without regular downtime, it will prove indispensable in the busy workshop environment. A 125mm outlet from the fan enables a quick and efficient transfer of shavings, chips and dust into the reusable storage bag.

For enhanced versatility, we have provided two 100mm inlet ports enabling two machines to be used simultaneously in conjunction with the F50-842. A massive airflow rate of 2529m3/hour(42.15m3/min) more than copes with this demand.

Like the other models in the range, the F50-842 benefits from an integral trolley base, guaranteeing ease of manoeuvrability.

Technical Specifications

- Motor: 240V x 1500W 2hp
- Filtration: 35 microns
- Bag Size 160 Litres

Leica DISTO™ D110 Laser Distance Meter 60m Bluetooth®

The Leica DISTO™ D110 is the first laser distance meter with Bluetooth® Smart technology that fits into a pocket. Its handy design with a pocket clip and simple functions make it a perfect tool for anyone who wants to take effortless measurements.

Whether you need a quick material estimation or you work on a home improvement project, the Leica DISTO™ D110 with integrated Bluetooth® Smart and the free Leica DISTO™ sketch app offers you endless possibilities to create sketches, generate floor plans, document your measurements with pictures using a smartphone or a tablet.

Bluetooth® Smart:
The latest Leica App DISTO™ sketch is the ideal link between the Leica DISTO™ D110 and a smartphone or tablet. With it you can prepare layouts and drawings, and dimension them precisely.

Quick distance and area measurements:
Excellent for quick distance and area measurements, the Leica DISTO™ D110 is your ideal tool for all kinds of measurement tasks.

V679-705

Functions:
- Distance
- Area Calculation
- Leica Sketch App

Specifications:
- Accuracy: ±1.5mm.
- Range: 0.20 - 60m.
- Measurement units: m, ft, in.
- Batteries: 2 x AAA.
- Dimensions: 120x37x23mm.
- Weight (with batteries): 92g.
- Protection Class: IP 54 (dust and splash water protected).

Box Contents:
- 1 x D110 laser distance measure
- 1x Holster
- 1x Pocket Clip
- 2x AAA Batteries

Leica DISTO™ D2 Laser Distance Meter 100m Bluetooth®

The Leica DISTO™ D2 laser distance meter combines practical functions in a simple and compact design. Specifically designed for indoor applications, it has shortcut keys for addition, subtraction, area and volume calculation which make measuring fast and very reliable.

In addition the Leica Disto D2 features stake out, last 10 measurement recall and Pythagoras functions which allow indirect measurements of height or width.

As with all Leica laser distance meters, the laser dot is clearly visible, allowing the user to see the targeting point even if the target object is in a hard to access area. The measurement results are clearly displayed on three lines. Thanks to the illuminated display, they are easy to read, even in the dark.

Whether you need a quick material estimation or you work on a home improvement project, the Leica DISTO™ D2 now with integrated Bluetooth® Smart and the free Leica DISTO™ sketch app offers you endless possibilities to create sketches, generate floor plans, document your measurements with pictures using a smartphone or a tablet.

Bluetooth® Smart:
The latest Leica App DISTO™ sketch is the ideal link between the Leica DISTO™ D2 and a smartphone or tablet. With it you can prepare layouts and drawings, and dimension them precisely.

Quick distance and area measurements:
Excellent for quick distance and area measurements, the Leica DISTO™ D2 is your ideal tool for all kinds of measurement tasks.

Functions:

STRHS16

Starret HSS Bi Metal Holesaw

Starrett Bi Metal Constant Pitch Hole Saws have 6 teeth per 25mm/inch and are ideal for thinner gauge materials.

The Constant Pitch provides a smooth cut, with minimal tendency to bite or snag on contact with irregular surfaces.

They are constructed of hardened, heat and abrasion resisting high speed steel teeth with a tough alloy body and cap, this gives them exceptional strength, durability and shatter resistance for user safety.

They will cut any wood, metal or plastic in either a hand-held drill or a drill press.

Tap Wrenches

With all steel, hardened and tempered bodies, solid construction, hardened ground jaws and knurled adjustable handles for extra grip. Straight handle design provides greater leverage, especially when using larger diameter taps.

Handiburr Rethreaders

Handiburr Rethreaders are based on a High Speed Steel Tap permanently fitted with a handle. They are designed principally for cleaning out the fixing holes in socket-switch or conduit-boxes, as these often have malformed threads or are blocked by plaster or cement.

Code	Size	Diameter	Box/Pack qty

W041-775

Y-Cutter SDS Plus Hammer Bits

3-D cutting edge profile in Y-form for exact positioning and perfect starting. Long service life and low probability of breakage even on impact with reinforcements, thanks to the highly effective technique ofhardening by blasting (HST hardening). High drilling speed thanks to wide Twinmax spiral and customised head geometry. Optimum low-vibration drilling protects the user.

Multi Purpose & Rotary Drills

Multi-Purpose Cordless Drill Bits

The ideal universal drill bit for a multitude of materials used on the building site. The use of one drill bit for diverse materials and composites saves time and money. Drilling also possible on smooth and hard surfaces thanks to the diamond-ground tungsten carbide chisel edge. A light impact may be used for drilling in brickwork & stone.

Countersink Drill Bits

Tungsten Carbide tipped version of the popular Snappy drill countersink with adjustable slow spiral v point HSS drill and non marring depth stop. This tool can be used in abrasive materials such as laminated chipboard. The drills produce pilot holes only.

Trend Snappy Countersink 5pc. A five piece set of heat treated tool steel countersinks with hex shafts. They are fitted with High Speed Steel drill bits to cover the full range of screw sizes and are self clearing. They are adjustable for different length screws and will produce a 9.5mm (3/8in) or 12.7mm (1/2in) diameter counterbored hole to fit standard woodplugs.

MC1M Muticut Step Drills

The most versatile hole-cutting tool for rapid drilling and enlarging holes in thin materials up to 14 gauge. Designed for industrial applications, the diameter of the hole increases as the CONECUT is advanced into the material, providing infinitely variable sizes.

For use in sheet steel, non-ferrous metals, plastics, Formica and plywood.

For imperial/metric, unless otherwise specified, Conecut with a steam tempered blue surface treatment, which is advantageous in many applications will be supplied. However, should it be required, all imperial/metric tools can be supplied with bright ground finish on body and paint.
