

TECHNICAL DATA SHEET

Line Marker Two Wheeled Applicator

Readyfix product code: Z631-101

Product overview

A two-wheeled aerosol applicator designed to produce straight, consistent lines on car parks, warehouses, playing fields, roads and other marked areas. The thumb-operated trigger controls paint application while the wheel-mounted guide disc helps provide a clean edge.

KEY FEATURES

- Thumb-push trigger for controlled paint delivery.
- Two-wheel design helps keep the applicator tracking straight.
- Internal guide disc supports a clean, defined line edge.
- Rubber tyres provide improved grip during use.
- Suitable for 600ml and 750ml line-marking aerosol cans.
- Compatible with temporary and semi-permanent line-marker paints.

MATERIALS

Body frame	Square steel tubing with black painted coating
Wheel rims	Tough white plastic
Tyres	Black rubber

TECHNICAL SPECIFICATION

Wheel diameter	150mm
Handle height	800mm
Overall length	900mm
Nominal line width	50mm
Can compatibility	600ml and 750ml aerosol cans
Operation	Manual thumb-trigger application

ADJUSTMENT AND USE

- Secure the correct line-marker aerosol in the can holder before use.
- To change between 600ml and 750ml cans, unclip the trigger-system pin and reposition the connecting bar to the alternative setting.
- For an especially crisp line, mark the boundaries with masking tape before spraying.

OPTIONAL FOUR-WHEEL CONVERSION

The applicator can be converted to a four-wheel configuration using the compatible two-wheel adaptor (manufacturer reference BD3), providing additional stability where required. Adaptor supplied separately.

IMPORTANT USE AND SAFETY INFORMATION

The applicator is a mechanical device and does not require a Safety Data Sheet. Before use, read the label and current Safety Data Sheet for the aerosol paint. Use with suitable ventilation and PPE, following all storage, handling and disposal instructions. Inspect the applicator and ensure the aerosol can is firmly secured before operation.
