\*Calculated from the stated bottle volume and pack quantity.

### Typical mineral analysis at source

| Property     | Typical value | Property             | Typical value     |
|--------------|---------------|----------------------|-------------------|
| Calcium      | 49.30mg/L     | Magnesium            | 6.50mg/L          |
| Potassium    | 0.77mg/L      | Sodium               | 11.70mg/L         |
| Chloride     | 21.00mg/L     | Sulphate             | 20.70mg/L         |
| Nitrates     | 7.10mg/L      | Dry residue at 180°C | 234.00mg/L        |
| pH at source | 7.96          | Analysis basis       | Typical at source |

Typical values at source; natural variation may occur.

### Storage and handling

Store unopened bottles in a cool, clean and dry place, away from direct sunlight, heat, freezing conditions and strong odours. Protect the outer packaging from damage and moisture.

### Use and disposal guidance

Check the seal is intact before use and observe the best-before information on the bottle or outer pack. After opening, reseal where applicable, keep refrigerated and consume promptly in accordance with the label. Recycle the empty bottle and cap where local facilities accept them.

The information above reflects the published product specification at the date of issue. Packaging and specification may change; confirm critical requirements before ordering.
